SUMMARY

Computer Science and Software Engineering student with hands-on experience designing and developing software applications using Java, Python, and SQL. Experienced in leading software development teams, building database-driven applications, and delivering projects throughout the Software Development Life Cycle. Passionate about developing efficient, scalable software solutions while continuously expanding technical knowledge through collaborative engineering projects.

EDUCATION

Kennesaw State University, Marietta, GA | GPA: 3.4 | President's List

Bachelor of Science in Computer Science, Concentration in Artificial Intelligence Expected Graduation: May 2027

Bachelor of Science in Software Engineering

Relevant Coursework:

Programming and Problem Solving, Database Systems, Data Communications, Operating Systems

TECHNICAL EXPERIENCE

Languages: Java, SQL, JavaScript, Python, R

Software Development: Object-Oriented Programming, Data Structures, Algorithms, Database Design, Debugging, Software Testing, Software Development Life Cycle

Databases: SQL Server, MySQL, Query Optimisation

Tools & Technologies: Visual Studio, IntelliJ, Microsoft Office Suite, Linux, Windows, macOS

PROJECT EXPERIENCE

Software Project Management System | Team Lead, Software Development | May 2026 – July 2026

- Led a team of five members in the design and development of a software project management system focused on improving team organization, communication, and project tracking.
- Created and maintained project documentation, including planning materials, requirements, and development resources to support the software development process.
- Established a centralized collaboration space to improve communication, share updates, and coordinate tasks among team members.
- Managed team responsibilities, delegated tasks, and supported the completion of project milestones through effective leadership and collaboration.
- Successfully delivered a functional project management system that enhanced team workflow, organization, and communication throughout the development process.

Calorie Tracking System | Application Development, Testing | Jan. 2025 – Apr. 2025

- Collaborated with a team of four to develop a calorie tracking application that allows users to log meals, monitor nutritional intake, and track daily goals.
- Contributed to system design, testing, and feature development while maintaining effective communication with team members.
- Participated in code reviews and incorporated feedback to improve application quality and overall functionality.

PlayStation Website | SQL, Web Development | Aug. 2024 – Dec. 2024

- Developed a PlayStation-themed website integrated with an SQL database to manage customer order numbers and user information.
- Implemented database interactions to support efficient data storage, retrieval, and management.
- Applied problem-solving skills to improve website functionality and ensure reliable data handling.

Blu-Ray Collecting Management System | Java, App Development | Jan. 2023 – May 2023

- Designed and developed a Blu-Ray collection management system capable of organizing and storing media information efficiently.
- Implemented data structures to improve application performance and usability.
- Demonstrated analytical thinking throughout software design and implementation.
- Created technical documentation supporting future maintenance and system enhancements.

WORK EXPERIENCE

North River Church of Christ – Media & Livestream Technician | Jan. 2026 – Present

- Manage livestream production for weekly worship services and special church events.
- Edit recorded services and promotional videos for online distribution.
- Troubleshoot technical issues during live broadcasts to ensure uninterrupted streaming.

WIN Cancer Foundation – Administrative Assistant | Jan. 2024 – May 2025

- Assisted with fundraising events supporting cancer awareness and community outreach initiatives.
- Helped coordinate event logistics, volunteer activities, and attendee registration.
- Contributed to organizing successful community events through strong communication and teamwork.
