SUMMARY

Computer Science and Software Engineering student pursuing dual bachelor's degrees with a concentration in Artificial Intelligence. Experienced developing machine learning algorithms, neural networks, and data-driven solutions using Python. Hands-on experience implementing classification, regression, clustering, dimensionality reduction, and deep learning models. Passionate about applying artificial intelligence and software engineering principles to develop intelligent systems that solve real-world problems.

EDUCATION

Kennesaw State University, Marietta, GA | GPA: 3.4 | President's List

Bachelor of Science in Computer Science, Concentration in Artificial Intelligence Expected Graduation: May 2027

Bachelor of Science in Software Engineering

Relevant Coursework:

Programming and Problem Solving, Artificial Intelligence, Machine Learning, Database Systems

TECHNICAL EXPERIENCE

Languages: Java, SQL, JavaScript, Python

Artificial Intelligence: Machine Learning, Neural Networks, Convolutional Neural Networks (CNNs), Clustering, Model Evaluation, Regression

Frameworks & Tools: Python, NumPy, Pandas, PyTorch, Scikit-learn, Google Colab

Software Development: Object-Oriented Programming, Data Structures, Algorithms, Software Testing

PROJECT EXPERIENCE

Logistic Regression & Time Series Forecasting | Python, Machine Learning | June 2026 – July 2026

- Developed a logistic regression algorithm from scratch to classify breast cancer data into malignant and benign categories.
- Implemented a 70% training and 30% testing dataset split to evaluate model performance using classification accuracy.
- Applied predictive modeling techniques to analyze healthcare data and develop a binary classification solution.
- Created a time series forecasting model to predict future gas prices using historical 40-day pricing data.
- Applied sliding window techniques and regression-based approaches to forecast future trends over a seven-day prediction period.
- Strengthened understanding of supervised learning, prediction algorithms, and real-world data analysis.

Neural Network & CNN Image Classification | Python, PyTorch/Keras | June 2026 – July 2026

- Developed a feedforward neural network from scratch using Python to classify the Iris dataset with a custom [4-2-2-3] network architecture.
- Implemented training, testing, and evaluation processes using a 70% training and 30% testing dataset split.
- Built a convolutional neural network (CNN) to classify CIFAR-10 image data containing 10 image categories.
- Preprocessed image datasets and evaluated model performance using classification accuracy and F1-score metrics.
- Applied deep learning techniques to improve image recognition performance.

Machine Learning Classification & Regression Algorithms | Python | June 2026 – July 2026

- Implemented machine learning algorithms from scratch, including K-Nearest Neighbors (KNN), Learning Vector Quantization (LVQ), and Linear Regression.
- Applied KNN and LVQ algorithms to classify the Iris dataset using a 70% training and 30% testing split.
- Developed a linear regression model to predict housing prices using the Boston Housing dataset.
- Evaluated model performance using classification accuracy and mean squared error metrics.
- Strengthened understanding of supervised learning algorithms through algorithm implementation without pre-built ML functions.

WORK EXPERIENCE

North River Church of Christ – Media & Livestream Technician | Jan. 2026 – Present

- Manage livestream production for weekly worship services and special church events.
- Edit recorded services and promotional videos for online distribution.
- Troubleshoot technical issues during live broadcasts to ensure uninterrupted streaming.

WIN Cancer Foundation – Administrative Assistant | Jan. 2024 – May 2025

- Assisted with fundraising events supporting cancer awareness and community outreach initiatives.
- Helped coordinate event logistics, volunteer activities, and attendee registration.
- Contributed to organizing successful community events through strong communication and teamwork.
